

SPREAD BAGELRY

GLUTEN-FRIENDLY BAGEL FACT SHEET

Original Sunshine bagels use non-GMO unbleached wheat starch that goes through a natural rinsing process to remove the gluten. Under the FDA's gluten-free labeling rule, wheat starch is allowed in gluten-free foods if the final product contains less than 20ppm of gluten, which is the case with **Original Sunshine**. Wheat starch is not a wheat grain and is not a wheat protein.

If ordering an **Original Sunshine** Gluten-Free Bagel for a bagel sandwich or with a spread, we will be preparing it in the same space as our traditional bagels; cross contamination may occur.

ABOUT ORIGINAL SUNSHINE
